Vitiligo is a disease that is characterised by white blotches on the skin due to loss of normal skin color. It can affect the skin on any part of the body. It may also affect hair and the mucosal surface. Usually the mark first shown on sun exposed sites and trauma prone sites such as hands, feet, arms, face elbow knee etc.

The colour of hair and skin is determined by a pigment present in human skin and hair known as melanin. Vitiligo occurs when the cells called melanocytes that produce melanin die or stop functioning. Vitiligo affects people of all skin types, but it may be more noticeable in people with darker skin, like in Indian population. One thing that must be clear is that vitiligo is not life threatening or contagious. However due to the obvious cosmetic blemish it can be stressful, patients often have inferior complex and depression.

As **SIMPATY** believes in helping for society a free camp was organized on 2nd sep. 2017 at **SIMPATY INSTITUTE, C-79/6, OM NAGAR, BADARPUR** as 8 am up to 12 o'clock where people were consulted for this vitiligo and other skin problem and also given medicines free of cost.

The camp was inaugurated by –

Simpaty's Director Dr. R.KANT. They aware about Vitiligo, skin disease and deficiencies for the disease in inaugural lecture and also about homoeopathic aspects of treatments. Dr B.S. Mathur senior Homoeopathy Physician gave their advice for the disease.

Thirty three patients of vitiligo and twenty seven patients of different kind of skin disease were visited to this camp. Our experts gave them advice and medicine free of cost to the patients who are suffering from vitiligo, and the programme came to its end with refreshment to the staff.
