The thyroid is a vitally important hormonal gland that plays a major role in the metabolism, growth and maturation of the human body. It helps to regulate many body functions by constantly releasing a steady amount of hormones into the blood stream.

The function of the thyroid gland is to take iodine, found in many foods, and convert it into thyroid hormones Thyroxine (T4) and Triiodothyronine (T3) Thyroid cells are the only cells in the body which can absorb iodine.

Any dysfunction of thyroid gland can lead to hypothyroidism or, hyperthyroidism. Apart from these Hashimoto's disease, Grave's disease, Goiter, thyroid nodules are also common now-a-days. Common problems in children are hypothyroidism, hyperthyroidism thyroid nodule and thyroid cancer.

Keeping above fact in view SIMPATHY organized free thyroid camp on 13th Aug. 2017 at his head quarter Om nagar, Badarpur, New Delhi. The camp was inaugurated by Dr. Sanjeev Sharma Member of homoeopathic council of Haryana.

Fifty (50) patients were visited in to the camp. Simpathy provided services for Blood test (thyroid profile test), consultation and medicine free of cost, 22 patients are detected by our expert of doctors. They are suggested for regular treatment and does or don'ts in this disease.

And the camp was come to an end with refreshment.
